SMS Implementation PART 145/M/G workshop raised the following issues regarding EU regulation 1321/2014 :

- ◆ Draft a detailed TDGCA action plan to prepare the implementation of the SMS in the CAMO organization
- ◆ Implement coordination between the OPS and Airworthiness departments activities in the frame of the preparation and implementation of the SMS for CAMO
- ◆ Develop guidance materials

Airport and Air navigation certification: French experience for Turkey

M. Eric, O. Dungun, O. Doğan and J.C. Barbieri discuss European airport certification processes in Toulouse in September 2016.

The autumn period has been very fruitful for the project: activities this quarter, in line with the overall objective of the twinning programme, were aimed at enhancing the level of safety through the following missions concerning: certification of aerodromes and new air navigation services, SMS Implementation for PART 145/M/G, Part-66 National license system implementation, Part-66/147 Training Need Analysis (TNA) System Implementation, Co-ordinated approvals (MEL, RVSM, LVO, ETOPS), UAV airworthiness. Two important missions concerning capacity building of auditors in the field of aeromedicine, as well as on the job training for ramp inspectors, took place in October 2016. 5 Ramp inspectors paid a visit to their counterparts in Paris, Marseilles and Lyon airports, following a successful French mission in Istanbul and Antalya last May.

French-Romanian team shares on SMS implementation

Collaborative agenda drafting and concrete, clearly written mission reports are the key to successful twinning missions. But discovering Turkey also means, during trainings and workshops, drinking...lots of delightful Turkish tea!

The twinning team wishes you a very happy new year 2017!

This is a twinning partnership between the Directorate General of Civil Aviation, Republic of Turkey and the Directorate General of Civil Aviation, Ministry of the Environment, Energy and Marine Affairs, Republic of France, and Civil Aeronautical Authority, Romania.

December 24th, 2016 September - December 2016

Nine key-Turkish experts took part in ENAC (French National civil aviation school) trainings in Toulouse.

Two very well received missions have been organized by our Romanian CAA colleagues in Bucharest: in the field of UAV airworthiness requirements implementation, and to finish a gap analysis in REG EU 965/2012 Implementations, started in Ankara last May.

O. Aldemir, A. T. Pekin and C. Şişman visit Bordeaux ATC tower during certification of ANS mission in October 2016.

D. Ergüven, A. Ergün, M. Voicu and A. O. Yaman working on EU 965/2012 gap analysis in Bucharest in October 2016.

F. Sainton, C. Loloiu, A. Sahin and E. Sahin during a training session on SMS implementation for Part 145/M/G in Ankara in September 2016.
